About Us

Once it was rightly said by legendary scientist Albert Einstein ... The only source of knowledge is EXPERIENCE! With a strong belief in this idealism, a team of highly skilled engineers and technicians, having more than 20+ years of experience in the field of Wireless Communication and Networking Solution joined hands to form Bistech Solutions in the year 2019.

The next obvious target was market penetration. But, existence in the relevant market for more than two decades made it a piece of cake and Bistech Solutions secured its position as one of the eminent houses of “Mission Critical” network designing.

Thus, excellence reflected in performance, not in age.

Services

Radio Communication

Bistech Solutions is an authorised implementation agency of MOTOROLA™ MOTOTRBO™ - state of the art Digital Mobile Radio (DMR) Technology based solution.

Since the early era of introduction of DMR in medium and large scale enterprise as the primary two-way radio communication solution, MOTOROLA™ MOTOTRBO™ has evolved as the global benchmark.

The efficient combination of Portables and Mobiles Radios, together with various transmission equipments that falls under the extensive product

line of MOTOROLA™ Systems provides seamless tow-way radio communication for mission-critical scenario.

Our service includes:

<ul style="list-style-type: none">• DMR solution development• Sales of DMR products and Accessories & Spare parts• Turnkey basis Solutions	<ul style="list-style-type: none">• Repairing of Analog & DMR Radios• AMC of Analog & DMR Radios• Frequency licensing consultancy

Multipurpose Trunk Networking

Bistech Solutions expertise in designing and implementing customized Private Multipurpose Trunk Networking (PMTN) Solutions that provides a backbone for all kinds of data and VoIP requirements by and between geographically widespread branches of any medium or large enterprise.

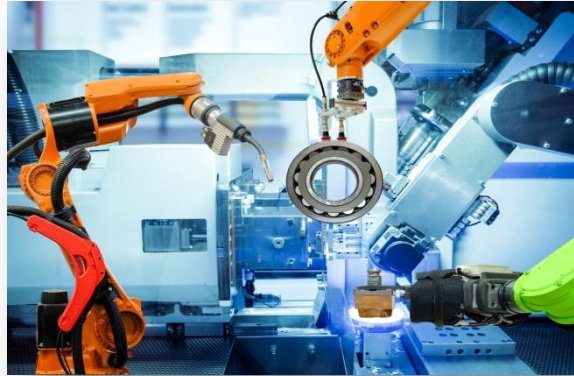

PMTN provides a secured one point network pipeline for all your organizational data. Such networks have enormous capabilities for combine and support:

- Software Defined Wide Area Network (SD-WAN)
- Secure Wi-Fi Hotspots
- Broadband Internet Connectivity
- Managed Cellular/LTE Network
- Voice Over IP Network
- Public Switched Telephone Network
- Video Surveillance Network
- Interactive Access Control System
- Intelligent Security Systems

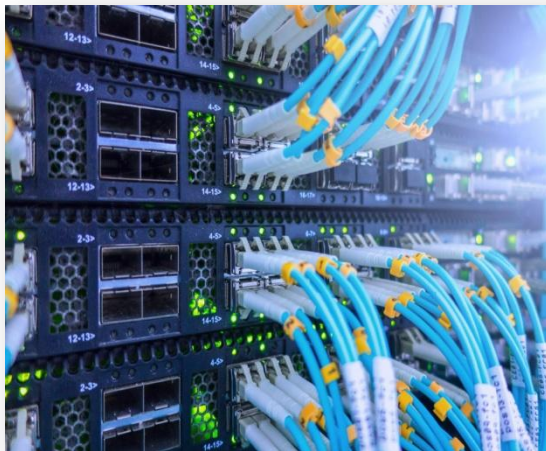

Electronics and Robotics

Robotics has been proven to improve productivity and quality across the industry. The use of robotics also substantially improves safety, and can eliminate risk of injury from the equation.

The Electronics and Robotics division of Bistech Solutions is equipped to develop tailor-made Robotic Solutions as per specific need of enterprises.

Broadband Solutions

As we already know... the Internet is the backbone of the digital economy, it underpins much of the world's social activity, and it is a powerful catalyst for innovation, economic growth and social well-being.

Bistech Solutions is proud to be a part of this socio-economic development of our country by

sharing our technical expertise for spreading the power of Internet in urban and as well as rural areas. Our Broadband Solutions are best suited for:

- Smart Cities Implementation
- Tele-medicine Network
- Public Safety Network
- Academic Network
- Enterprise Data Communication
- Public Internet Service
